

The group of junior professor Dr. Marcel Lauterbach, "Molecular Imaging" at the Center for Integrative Physiology and Molecular Imaging (CIPMM), has an open position for a

Student Assistant (m/f/d) Molecular Imaging

The focus of our research is on fine morphology of the glial cells and neurons in brain tissue of mice and turtles using super resolution STED microscopy.

We are currently seeking a student assistant to join our team in order to help us with animal facility maintenance and other tasks.

The work place is the CIPMM (Building 48), Campus Homburg.

Working hours: About 4 hours/week.

Requirements:

A background in biology, medicine or related fields, effective communication skills in English, and the ability to work collaboratively in a team environment. We welcome especially candidates who are able to have a flexible schedule during the week, according to varying experimental needs.

Please **send your application including certificates and a CV** to:
